

# DatsBotAI Project Roadmap Explainer

## Q1 May 2023 - public test trial

perfecting Bot and running a 3 stage public trial test.

This test will run for 24hours every week where pioneer account holders can monitor how the bot executes trades via their dashboard. This test will be conducted in real time market with a capital of \$50,000 and the profits generated will be distributed amongst the first batch of 3000 early registers /pioneer account holders, who completed their tasks.

- 1st batch=1-1000 accounts(based on first registers)
- 2nd batch =1001-2000 accounts(randomly selected registers)
- 3rd batch=2001-3000 accounts(randomly selected registers)

Profits realized at the end of each public test bot trial will be distributed accordingly. (NB: \$200 will be set aside from each profits generated as the gas fee for bulk payout while the balance will be distributed)

DatsbotAi

## **Q1 June 2023 - Official launch**

Giving public access to the DatsBotAI technology , this will enable users to utilize our bot services to maximize their crypto profits and as well build a steady side stream income. While this is ongoing, the community of users will be given the opportunity to secure a 30% slot of community allocated native token through our "liquidity chest program" LIQUIDITY CHEST PROGRAM(LCP) - every user will be given the opportunity to lock in at most \$10,000 per account. This involves users locking their desired profits generated from the bot or as well externally deposit new cash for this purpose . Upon minting of native token and development of blockchain ecosystem, initial 30% of total 40% mapped out on our tokenomics for the community will be up for claims. This entails that users can lock in a slot for \$10,000 worth of our native token. 48hours prior to listing on exchanges. Users can claim their locked in value of our native token using their unique username and as which their LCP account exists with. The team will be minting 500,000,000 of our native token and 30% of the total supply will be available on our LCP @price of \$0.066 per piece of DatsBotAI native token for users to lock in while Remaining 10% will be

periodically unlocked to the community according to the proposed release clause of three months interval.

80% of the profits generated from the AI bot prior to minting of native token will be locked into the LCP pool by the team without right to claim so as to build up the pool faster to Atleast 40% value of the total supply, so upon listing our native token on exchanges, it is sure to soar high in value if holders decides not to sell off immediately.

### **Q2 December 2023 - Minting of DatsBotAI native token**

Introducing the DatsBotAI blockchain native token.

### **Q1 January 2024 - BOT Upgrade**

Test running for compatibility of DatsBotAI native token with the system.

### **Q1 February 2024 - Listing**

listing of DatsBotAI native token on major exchanges such as Huobi, coinbase, uniswap and binance. The team will make further moves

towards expanding the DatsBotAI native token on other legible major exchanges. Public trading of DatsBotAI native token will now be available

### **Q1 March 2024 - BOT Suscription**

limiting access only to paid subscribers. 60% of derived revenue(funds) from subscription fee will be distributed amongst pioneer holders monthly (participants of the LCP )

### **Q1 March 2024 - Payment gateway**

DatsBotAI adopts it's native token as only payment method. (activation and funding of DatsBotAI trading bot will only be possible using our native token. Payouts will be done through Usdt). This feature is put in place to create a steady demand for DatsBotAI native token.

### **Q1 April 2024 – Onboarding builders**

Onboarding smart contracts, nfts and other crypto projects to host thier system on our blockchain network.

## **Q2 September 2024**

Market exchange.- DatsBotAI will launch a market exchange platform. For easy buying, selling and transferring of crypto assets at a flat rate of 0.75%(excluding swaping at flat fee of \$1.5).

## **Q1-january 2025**

Wallet- DatsBotAI will introduce it's own crypto e-wallet with a flat service rate of 0.5% provided its conducted using our blockchain network.

DatsBotAI will also introduce its own cold storage wallet.

## **Q1 January 2026 - Debit card**

Introduction of our first model universal crypto debit card. This will be used to authorize withdrawals via our in-house p2p system of fiat liquidity providers. The card will be used to withdraw crypto (DatsBotAI native token) into any approved fiat bank account through our ecosystem of fiat liquidity providers.

*Futher moves on DatsBotAI will be  
communicated to the community*
